Adani Group has \$2-billion bonds to repay in 2024

AMMAR ZAIDI
New Delhi, March 5

THE ADANI GROUP, whose mostly debt-fuelled breakneck expansion saw its gross debt doubling in four years, has almost \$2 billion worth of foreign-currency bonds coming up for repayment in 2024, according to a presentation the conglomerate made to investors.

The apelles-to-airport conglomerate borrowed over \$10 billion in foreign currency bonds between July 2015 and 2022 across group companies. Of this, \$1.15 billion of bonds matured in 2020 and 2022.

There are no maturities in 2023 but three issuances —

Gautam Adani, chairman, Adani Group

\$650 million by the ports arm APSEZ and two of renewable energy unit Adani Green Energy (\$750 million and \$500 million — are due for payment in 2024.

The Adani Group management, including chief financial officer Jageshinder Singh, last month held roadshows in Singapore and Hong Kong to reassure investors that the company's finances are under control. These are to be extended to Dubai, London and the US from March 7 to 15. Executives told investors they will address upcoming debt maturities, including by potentially offering private placement notes and using cash from operations.

The Adani Group's gross debt has grown from ₹1.11 trillion in 2019 to ₹2.21 trillion in 2023, according to the presentation made to investors last month. After including cash, the net

debt was ₹1.89 trillion in 2023. There are no foreign currency bond maturities in 2023 but have \$1 billion of repayments due in 2024.

A month after a damning report by a US short-seller lopped off \$135 billion in market value from Adani Group's listed companies, it is hoping to claw back the narrative now by choosing slow and steady growth over the breakneck, mostly debt-fuelled, expansion of recent years. It has already scrapped ₹7,000 crore coal plant projects, decided not to bid for a stake in state-backed PTC, reined in expenses, repaid some debt and promised to repay more.

John Deere India exports tractors to US, Europe; sees FY23 sales at 900K

GEETA NAIR
Pune, March 5

JOHN DEERE INDIA has exported fully built tractors from its India plant to the US, Japan, Germany and other parts of Europe.

The company had shifted a line to manufacture the 5M range of its high-end higher horsepower tractors in India during the Covid-19 pandemic to leverage the manufacturing and supply base in the country.

Shailendra Jagtap, managing director and country manager, India, John Deere, said the company exported tractors made in India to 110 countries and the 5M was the latest series to be exported out of the country. These are tractors in the 75-130 HP range and are being manufactured exclusively for the export markets. The company is

The company, which has completed 25 years of operations in India, is also exporting components and electronic systems from India

at present exporting around 35% of its total production.

Jagtap said the company is not only exporting tractors but also components and electronic systems from India. There are 80 Indian suppliers of John Deere India who have now become global suppliers and are playing a part in the advanced products being developed by Deere globally, he added.

In addition, John Deere India is also developing products, providing engineering and IT sup-

port to the global operations with a 4,400-strong team located in Pune and Bengaluru.

Mukul Varshney, region 1 director (corporate affairs), John Deere, said it will continue to invest and leverage manufacturing talent and India's supply chain to serve farmers in India and around the world, with growth expected in both the domestic and export markets.

John Deere India, a subsidiary of John Deere Singapore (an arm of Deere & Co), has

recently completed 25 years of operations in India. The company has a customer base of 700,000 with around 10% share of the Indian tractor market and a leading position in the 45 HP and higher range.

The country's total tractor sales in FY23 are expected to be at 900,000 units and FY24 is also expected to remain at a similar level, but this would depend on the monsoon, Jagtap said.

Apart from tractors, John Deere now also has a road construction firm in India which was part of the global acquisition of Wirtgen Group.

Why is Sebi yet to get to the bottom of Mauritius funds' ownership: Rajan

PRESS TRUST OF INDIA
New Delhi, March 5

FORMER RBI GOVERNOR Raghuram Rajan has asked why Sebi has not yet got to the bottom of ownership of the four Mauritius-based funds which are said to have parked 90% of their \$6.9 billion in Adani Group stocks.

The funds — Elara India Opportunities Fund, Cresta Fund, Albulu Investment Fund and APMS Investment Fund — have been under cloud for the last few years after allegations that they may be

Raghuram Rajan, former RBI governor

shell companies. They came into focus again in January when a US short-seller alleged that Adani Group used offshore shell firms to inflate stock price. Adani Group has repeatedly denied

all allegations. The issue is of reducing non-transparent links between govern-

ment and business, and of letting, indeed encouraging, regulators do their job. Why has Sebi not yet got to the bottom of the ownership of these Mauritius funds which have been holding and trading Adani stock? Does it need help from the investigative agencies? Rajan asked.

Because funds are registered in tax haven Mauritius, their ownership structure is opaque.

Cresta, Albulu and Elara have been subject to at least one probe for alleged round-tripping.
